

High Speed Spindle

Ray Foster precision high speed automatic spindle is designed for heavy duty, continuous operation. Quiet and smooth running, it permits tool changes in seconds without stopping the motor. A simple turn of the handle disengages the clutch, stops the tool from rotating, and opens the collet to allow the tool to be removed and a new tool installed. Now available to fit most brands of alloy grinder as replacement or upgrade.

Features

- Available to fit most brands of alloy grinders
- Quick change mechanism
- Easy disassembly for onsite self-repair
- High speed operation
- Fast, on-the-fly replacement of tools
- Made in USA.
